Professional Experience

Field Manager
2023 - Present

Incentro APAC

- Led and managed a high-performing engineering team across multiple projects, ensuring the successful delivery of high-quality software solutions to clients.
- Collaborated with cross-functional teams to develop and implement web applications using technologies such as Node.js, React, Vue, AWS and Google Cloud.
- Successfully delivered projects for clients and meeting all project requirements and exceeding client expectations.
- Implemented best practices and coding standards, resulting in clean, efficient, and maintainable codebases.
- Conducted code reviews and provided constructive feedback to team members, fostering a culture of continuous improvement and growth.
- Utilized agile methodologies to manage project timelines, resources, and deliverables, ensuring projects were completed on time and within budget.
- Maintained clear and effective communication with clients and stakeholders, ensuring alignment and understanding of project goals and progress.
- Mentored and coached team members, fostering their professional growth and ensuring high-quality code delivery.
- Proactively stayed updated with the latest frontend technologies and trends, incorporating them into projects to enhance functionality and user experience.

Senior Developer
2022 - 2024

Kintell

- Collaborate closely with product and back-end teams as a senior frontend developer at Kintell, contributing to the successful development and launch of an innovative EdTech product.
- Design the architecture for web applications using Nuxt.js, ensuring scalability, performance, and maintainability.
- Contribute to the implementation of responsive and user-friendly interfaces, resulting in a seamless and engaging user experience.

Tech Lead
2020 - 2021

Bonza

- Led and managed a high-performing frontend team, collaborating closely with product, design, and back-end teams to successfully develop and launch a SaaS product.
- Designed the architecture for web applications using Nuxt.js, ensuring scalability, performance, and maintainability.
- Developed a comprehensive design system that streamlined the development process and ensured consistency across multiple projects.
- Implemented best practices and coding standards, resulting in clean, efficient, and reusable code.
- Conducted regular code reviews and provided constructive feedback to team members, fostering a culture of continuous improvement and growth.
- Actively participated in cross-functional meetings and discussions, effectively communicating technical concepts to non-technical stakeholders.
- Maintained clear and concise documentation, facilitating knowledge sharing and onboarding of new team members.
- Proactively stayed updated with the latest frontend technologies and trends, incorporating them into the development process to enhance the product's user experience.

Tech Lead
2019 - 2020

Schoters

- Led a team of frontend engineers in the successful re-architecture of the web application, built in Nuxt.js, Typescript, and Vuetify, resulting in improved performance, enhanced user experience, and increased scalability.
- Spearheaded the implementation of a robust payment system, ensuring secure and seamless transactions for the e-commerce platform.
- Optimized the performance of the web application, resulting in faster loading times and improved responsiveness, leading to increased customer satisfaction and engagement.
- Collaborated with cross-functional teams to gather requirements and translate them into actionable frontend development tasks.
- Mentored and coached team members, fostering their professional growth and ensuring high-quality code delivery.
- Conducted regular code reviews, providing constructive feedback and ensuring adherence to best practices and coding standards.
- Maintained clear and concise documentation, facilitating knowledge sharing and ensuring smooth onboarding of new team members.
- Took ownership of continuous improvement initiatives, staying updated with the latest frontend technologies and trends, and implementing them to enhance the web application's functionality and user experience.

Tech Lead
2017 - 2019

Oddbit

- Led and managed a high-performing frontend team across multiple projects, ensuring the successful delivery of high-quality software solutions to clients.
- Collaborated with cross-functional teams to develop and implement frontend applications using technologies such as Firebase, Node.js, Angular, React, Vue, and Google Assistant.
- Successfully delivered projects for clients including goal.com, THNX (a digital agency in Sweden), and Google, meeting all project requirements and exceeding client expectations.

- Implemented best practices and coding standards, resulting in clean, efficient, and maintainable codebases.
- Conducted code reviews and provided constructive feedback to team members, fostering a culture of continuous improvement and growth.
- Utilized agile methodologies to manage project timelines, resources, and deliverables, ensuring projects were completed on time and within budget.
- Maintained clear and effective communication with clients and stakeholders, ensuring alignment and understanding of project goals and progress.
- Proactively stayed updated with the latest frontend technologies and trends, incorporating them into projects to enhance functionality and user experience.

Software Engineer   2015 - 2017
Carriage

- Collaborated closely with the design and product teams to develop a cutting-edge on-demand delivery service web application, resulting in increased customer satisfaction and business growth.
- Led the system design process, including the development of the database and REST APIs, ensuring a robust and scalable architecture.
- Utilized Ruby on Rails to build the web interface, delivering a user-friendly and visually appealing application.
- Implemented rigorous testing and debugging procedures, ensuring the reliability and performance of the web application.

Junior Developer   2015 - 2015
Magloft

- Contributed to the maintenance and improvement of the Magloft platform as a Fullstack Engineer intern.
- Utilized Ruby on Rails to develop and enhance platform functionalities.
- Collaborated with the development team to identify and resolve technical issues.
- Successfully completed the internship program, gaining valuable hands-on experience in Fullstack development.

Junior Developer   2014 - 2015
PT. Jatelindo

- Contributed to the research and development team at PT. Jatelindo, specializing in low-level payment gateway solutions between merchants and banks.
- Collaborated with team members to develop and implement Java-based software solutions, ensuring seamless and secure transactions between merchants and banks.

Education

BA in Computer Science   2008 - 2015
Parahyangan University
